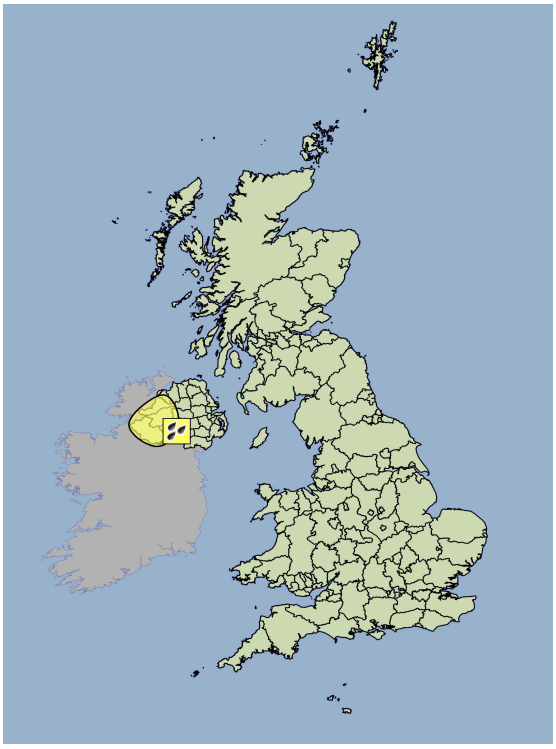
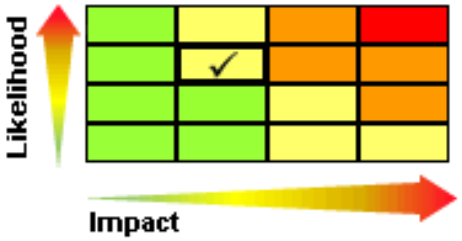
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system will move in across Northern Ireland on Saturday afternoon where it will become slow moving, before clearing eastwards later on Sunday morning. Rainfall totals of 5-10 mm are expected widely, with more than 25 mm locally. This rain will fall onto already saturated ground, so some localised flooding is possible.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **11:00 on Sat, 22nd Feb 2014** until **12:00 on Sun, 23rd Feb 2014**

An area of rain will become slow moving across Fermanagh, Tyrone and the west of Derry from Saturday afternoon through until Sunday morning. This rain will also be accompanied by strong winds, with gusts to around 50 mph locally.

Given the saturated conditions, the public should be aware of the potential for localised flooding.

This warning is an update to the alert issued on Friday.
